(as defined under Section 2(o) read with Section 2(ffc)
of the Copyright Act, 1957)

7. Title of the Work:

SITEKRAFT ? AI-POWERED WEBSITE BUILDER

8. Short Description of the Work:

Sitekraft is an AI-powered full-stack web application jointly developed by Sneha Chaudhary and Koustubh Kukreti, with academic guidance from their college mentor. The application enables users to generate complete, production-ready React/Vite websites from natural language descriptions through a conversational chat interface. The system integrates with Google Gemini 2.5 Flash (AI engine) to generate component-based React code, fetches relevant stock images from Pexels and Pixabay APIs, generates professional AI-written copy, and automatically deploys the generated website to Vercel with a live URL ? all within a single conversational session.

The software comprises:

- (a) A Python/FastAPI backend ? including an autonomous AI agent, React code generator, Vercel deployment module, stock image helpers, and professional copywriting module.
- (b) A React/Vite frontend ? including a conversational chat UI, multi-step onboarding flow, live preview, theme switching, and deployment status display.

NOTE ON AUTHORSHIP: The mentor provided academic supervision and guidance only, and does not hold authorship or copyright in the work. All original code, design, and creative expression were authored exclusively by Sneha Chaudhary and Koustubh Kukreti in equal measure.

9. Language of the Work:

Source code written in: JavaScript (React/JSX), Python 3.11
User interface language: English

10. Version / Edition:

Version 1.0

11. Total Lines of Code (approximate):
